Examiner's Amendments / Reasons for Allowance

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the Claims

2. Claims 31, line 14: delete "configured to return" and insert --returning--.

Reasons for Allowance

3. Claims 4-15 and 17-32 are considered patentable matter since the respective independent claims are tie to a machine or computer and such machine renders meaningful limits on the method claim's scope and the patentable matter does not include problem analysis wherein the problem statement was directly coupled to a knowledge base.

4. Claims 4-15 and 17-32 are considered allowable since when reading the claims in light of the specification (MPEP § 211.01), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 31, including "electronic model" (supported at e. g., page 1, lines 13-18), "components" (supported at e. g. page 6, lines 17-22), "relationships" (supported at e. g. page 8, lines 12-13), "problem analysis tool" (supported at e. g. page 1, line 13; page 3, line 10), "problem statement" (supported at e. g. page 3, lines 15), "query

formatter" (supported at e. g. page 3, line 18), "natural language query" (supported at e. g. page 3, lines 12-13), "Boolean query" (supported at e. g. page 3, lines 12-13), "Knowledge base" (supported at e. g. page 6, line 3), "set of solution" (supported at e. g. page 8, lines 21-23, page 9, lines 1-7) wherein an electronic model of the process is analyzed to produce a machine representation of the problem, such representation is transformed in to a natural language or Boolean query of such problem, such representation is automatically submitted to at least one knowledge data base with relevant solutions and an appropriate set of solutions is thereby identified.

The closest prior art (USPPGPubN 2005/0050096, Gomes et al.) teaches troubleshooting engine and use to assemble an interactive multimedia repair guide for assisting a service technician in the repair of a defective product. It would be obvious for such a process to include an electronic model with process relationships and to include in such model problems of a contemporary nature such that the function that prepares the initial multimedia service manual session would have information relevant to potential solutions. However, inter alia, Gomes does not teach specifically a machine representation of the problem such that a query formatter can develop a natural language query or Boolean query that would then automatically access a least one knowledge base to return a set of solutions. The process of the invention is important since it facilitates automatic use at least one of any one or a plurality (flexibility) of knowledge bases to establish the appropriate solution ... applicant's knowledge base is not directly coupled to the problem analyzer.

Independent claims 29, 30 and 32, inter alia, are allowed for reasons similar to those cited above.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this information or related to the subject disclosure should be directed to the Primary Examiner, Joseph P. Hirl, whose telephone number is (571) 272-3685. The Examiner can be reached on Monday – Thursday from 5:30 a.m. to 4:00 p.m.
